Nebulosa

DIGITAL DEVELOPMENT TAILORED TO YOUR NEEDS

COSMIC ENGINE

Hello
& Welcome

We are Nebulosa. We are a team of programmers and developers - a Cosmic Engine with a specific focus on seamless collaboration, total transparency, and secure delivery for every project we undertake.

We value convenience, excellence, and great communication with each of our clients, and this is our primary focus every day of work. With all services under one roof, it means less risk for you. We are a cohesive team of professionals with diverse capabilities which ensure forward momentum for your project, no matter its scale or size.

At Nebulosa, we help to create and lead open-source development technologies of the future.

When you work with us, you are driving ahead of your competitors, and you are gaining the most up-to-date assistance available on the market.

We understand that the needs of each client vary significantly. That's why we offer end-to-end software services across a range of platforms and technologies. We work directly with you to understand your needs and determine the ideal technology stack for your web, mobile, or cloud-based solution.

Let's take a look at our services and skills.

Our Services

A One-Stop-Shop For Creating

We specialize in the design and development of unique, user-friendly websites, and apps. We have all the skills you need under one roof.

MANAGED PROJECTS

If you are looking to launch your first digital product on the market, we can help.

Our team can take care of all aspects of your digital product, from creation to testing to implementation.

Want to expand your current portfolio to include digital products? Seeking to add new features to an existing and successful product? No problem - we have got you covered. Contact us to find out more.

STAFF AUGMENTATION

Our staff augmentation service provides you with the extra resources you need to bring your project to life.

We can provide development support when you need it most, especially while backfilling roles within your team. Contact us to find out more.

WEB DEVELOPMENT

Functional, branded, compelling, engaging.

Our website development team is experienced in both the front end and back end of website development so that you can engage your target audience with ease. No matter what type of website you need to create, we can help make it a reality. Contact us to tell us more about your website ideas - we are happy to help.
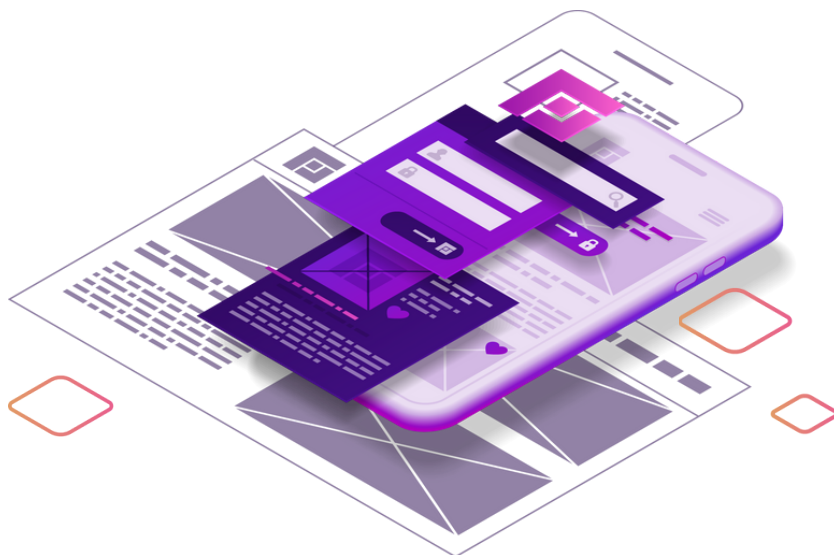

MOBILE ASSISTANCE AND DEVELOPMENT

Smartphones, tablets, wearables - we assist you in following your users where they are with our carefully crafted mobile apps. Reach your clients via Android, iOS, or cross-platform solutions.

Experts in:

- iOS App Development
- Android App Development
- Flutter Development
- React Native Development

DESIGN

Our design skills are varied to be able to assist you in every design project you may have.
From research and design of complex web and mobile experiences to illustration, motion design, and brand concept design - no matter what you need, we can help you bring it to life through our artistic, professional design capabilities.

Experts in:

- Product Design
- UX Design
- Illustration
- Consultancy

MACHINE LEARNING

We work with complex web and mobile experiences to help you serve and connect with your intended clients.

Experts in:

- Deep Neutral Networks
- Natural Language Processing
- Face ID
- Automatic Speech Recognition

DevOps

Our team of developers works in combination with our operations team to create a highly reliable and available infrastructure for your project. By working in collaboration, we deliver the end product faster than our competitors.

Experts in:

- Developing in DevOps Culture
- Infrastructure as a code
- CI/CD Processes
- Monitoring and Maintenance

BLOCKCHAIN

Our team consists of experts in Blockchain to help our clients launch their DApp, Exchange, or Wallet system with precision and care. We provide Smart Contract Development, R&D, or consultancy, depending on your needs and expectations for the project.
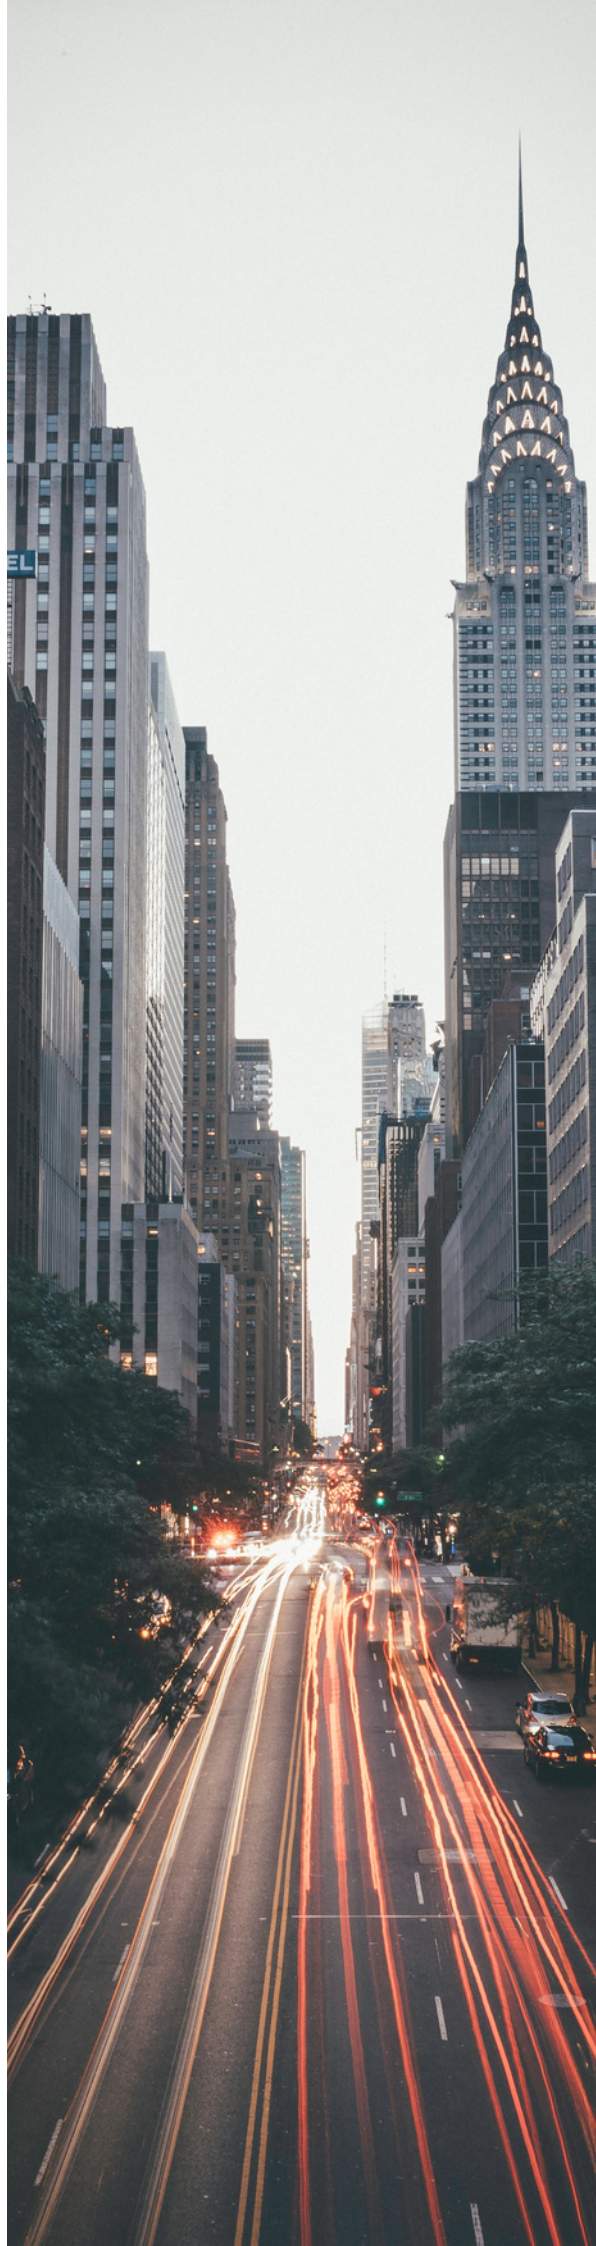

Experts in:

- ICO Development and Launching
- DApp Development
- Smart Contract Development
- Private Blockchain Development

TESTING

No matter what service you choose, we help you to avoid system bugs, UX issues, or other 'small errors' that result in lost clients and, in turn, lost revenue for your company.

When these bugs and errors go untreated or unrecognized, you could be dealing with a large-scale problem that could have been avoided. We go the extra mile to make sure this doesn't happen to you, your business, or your systems.

What we offer

STRATEGIC CONSULTING

We'll help you define your project's scope, stack, and solution, no matter how big or small.

FULL-SERVICE, FULL-STACK

Everything under one roof - that's the most significant advantage we offer our clients.

Nothing is beyond our capabilities. So, everything is possible.

GLOBALLY FOCUSED, FORWARD THINKING

With our experience in the industry, we understand how quickly things can change.

We are always looking forward, always one step ahead, so that we can offer you the latest technologies, the best solutions.

VERSATILE PERSONALIZED TECHNICAL GUIDANCE

Software development needs vary significantly. To cover the full spectrum of possibilities, we offer end-to-end software services across various platforms and technologies.

We work with you to determine the ideal technology stack for your web, mobile, or cloud-based solution.

Our Promise, Our Methods

We are a top employer in Mexico GDL - a state known for its technical excellence and precision.

We choose the top talent to complement our team so that your company gets the best out of each project.

PRODUCT STRATEGY

Our innovative strategists help determine where you're meant to go, why and then decipher the optimum way to get there.

ENTERPRISE PLANNING

We help you implement and adopt ERP software for managing large-scale enterprise challenges and go beyond the limits.

PUBLIC CLOUD OPTIMIZATION

With hands-on experience with AWS, MS Azure, and GCP, let our panel of experts save you pain and costs.

Quality Assurance Guaranteed

Versed in comprehensive testing best practices, our quality assurance analysts work with your team to identify, fix, and prevent software quality issues.

ABOUT US

As a fully distributed company we've found a formula that works. We truly believe and practice a work-life balance which allows us to create our best work.

Working together drives our curiosity

We aim to improve human capabilities through our own projects, our internal tools, and the many user experience challenges we take on.

We blend our knowledge and skill across disciplines in an effort to both teach and learn from ourselves, our clients, and our greater community .

We urge you to be yourself

We're not just designers, engineers, writers, and strategists.

We are also musicians, travelers, film buffs, and cooks, among many other things. Each of us brings a different perspective that translates to our craft and overall growth as a company. We respect and reward each other for that.
